Seeking a position as a software professional where I can collaborate effectively as a team member, applying my skills and abilities to contribute to the organization's growth and advance my professional career.

SOFTWARE SKILLS

Frontend Technologies:
- **HTML & CSS:** Familiar with creating responsive web pages and applying basic styling using CSS3.
- **JavaScript:** Knowledge of AJAX, JSON, client-side validation, DOM manipulation, and event handling.
- **Bootstrap**: Comfortable using Bootstrap for responsive design and grid layouts.

Backend Technologies:
- **Core Java:** Good understanding of Java basics, object-oriented design, exception handling, and collections framework.
- **Advanced Java (JDBC, JSP, Servlets):** Familiar with database connectivity, dynamic web page creation, and server-side programming.
- **Spring Boot:** Basic knowledge of building RESTful web services, dependency injection, and Spring MVC.
- **Hibernate:** Understanding of ORM, entity mapping, and basic use of Hibernate Query Language (HQL).

Database:
- **MySQL**: Familiar with basic MySQL database design, understanding normalization, and learning how to improve performance through indexing and query optimization.

SQL:
- Comfortable with writing SQL queries, creating basic stored procedures and improving database efficiency.
